

Life's Great Play, An interesting article by Joseph Hatton, the author of "Cruel London," will appear in Sunday's DISPATCH.

FORTY-FOURTH YEAR.

MORE MILLIONS

Go Up in a Fiery Furnace, the City of Boston Being the Latest Sufferer.

A GREAT WALL OF FLAME,

Against Which Streams of Water From Seventy Engines Were

WELL NIGH POWERLESS.

The Loss About \$12,000,000, and a Number of Brave Firemen Are Missing.

AN AREA OF 25,000 SQUARE FEET.

Covered With Great Buildings, Supposed to be Fireproof, Swept by the Fire.

INSURANCE COMPANIES IN PERIL.

Boston was the scene of yesterday's big fire. At present the losses are estimated at from \$12,000,000 to \$15,000,000. The insurance companies are hard hit. The fire swept a section of the city that was visited by a similar but even greater conflagration in 1872, the alarm coming from the same block. A number of firemen are missing, and it is thought they were killed by falling walls.

(SPECIAL TELEGRAM TO THE DISPATCH.)

BOSTON, November 28.—It was Boston's turn to fight fire to-day, and it was a fight for very existence. For four hours 70 engines, gathered from all parts of Eastern Massachusetts, struggled against a mighty wall of fire that was surging through the business district, leveling stone and brick buildings as though they were built of straw. It was on the same territory visited by the great fire of 1872, and the same box, No. 22, that sounded the alarm for that terrible visitation, was rung in for to-day's peril.

(SPECIAL TELEGRAM TO THE DISPATCH.)

Boston was the scene of yesterday's big fire. At present the losses are estimated at from \$12,000,000 to \$15,000,000. The insurance companies are hard hit. The fire swept a section of the city that was visited by a similar but even greater conflagration in 1872, the alarm coming from the same block. A number of firemen are missing, and it is thought they were killed by falling walls.

(SPECIAL TELEGRAM TO THE DISPATCH.)

Today's fire was a counterpart of the historic blaze of 17 years ago, but it was handled so successfully that the flames were choked off just as they were apparently about to sweep through the whole city. Chief Webber is the hero of the hour. Only the presence of an abundance of water saved the business portion of the city. The present heavy tax rate was created by the extensive system of water mains laid after the big fire, and there have been many who scoffed at the heavy expenditure. To-night these scoffers are blessing the foresight of the city from their hearts.

(SPECIAL TELEGRAM TO THE DISPATCH.)

The insurance companies are tottering under the weight of obligations entailed by this fire, coming as it does so soon after Lynn's visitation, and it is more than probable that many will go under.

(SPECIAL TELEGRAM TO THE DISPATCH.)

The situation is a grave one, and the worst will not be known until the wheels of business are set in motion to-morrow. If the insurance companies fail to meet their obligations, several business firms will probably be forced into insolvency; and as some of the largest houses are involved, the effect upon the general trade will be serious.

(SPECIAL TELEGRAM TO THE DISPATCH.)

The flames had short work of that building, and quickly worked their way toward the heavy stock, which bounded over to the street, where the flames were already eating their way into the structure. The fire was a violent storm was raging at the time, and but few people were upon the streets. Those who had no umbrellas had their coats collar turned up and hats pulled down over their eyes. They thought only of obtaining protection from the storm.

The rain was falling and the wind was blowing a gale. Of course those who had umbrellas couldn't see the tops of the buildings, anyway. This explanation is necessary to show how the fire obtained such headway before discovered.

JOHNSTOWN'S THANKS. A Peculiar Place for Thanking Services.—Sold Talk of a New Healer.—The Outdoor Life of a Frontier Town.—Amusements.

A Peculiar Place for Thanking Services.—Sold Talk of a New Healer.—The Outdoor Life of a Frontier Town.—Amusements.

JOHNSTOWN, November 28.—In a swirling snowstorm the sun of Thanksgiving sets on the Conemaugh. Two lights illumine the valley, the steady flare up the river at bridge No. 6, of both torch and carbon, where the sight railing gas takes up

The attention is so small because this is not a holiday in Johnstown. Every one is hard at work. On Sunday the number of people here reaches 100. The number of commutes for the week is 200 for three years, and shall remain my work a store if the number is not doubled by that time.

Mr. Bold's enthusiasm is largely born of the good impression of the practical methods of the Episcopal church, explained by Bishop Whitehead of Pittsburgh. "He is a 50 sewing machines at \$15 apiece," said Mr. Bold, proudly, "and gave to 50 sewing women, who have since earned their living by the needle."
